Subject: Follow up nesting bird survey needed

Importance: High

Hi Tay and Noel,

As we discussed at the site meeting on 7/12, a follow up nesting bird survey is now required. The last nesting bird survey was conducted on July 16, 2019. Mitigation Measure BIO-2b requires that the nesting bird survey is conducted no earlier than 2 weeks prior to commencement of construction activities.

The mitigation measure states “construction activities”. Typically that means any work on the site, including site prepping activities, as those activities also have the potential to disrupt nesting birds. This means prior to further vegetation clearing and installation of the construction entrance.

Also, Tay, did you hear back from CDFW regarding the woodrat buffer?
