Hi Deke and Corrin,

I'll get you a copy of the March 2020 civil plans. I'm forwarding your email to Jessie at SWCA, the County's mitigation monitor to address the concerns regarding the protection fencing, noise and dust control.

Thank you

Hi Camille,

Hope you and your family are well and weathering this Pandemic.

May we please ask if permit in place, when will the construction of chain link fence protecting the conservation easement will be installed as previously confirmed.

May we also request e-copy of March 2020 resubmitted civil engineering plan so we can be sure no height changes from that approved. I cannot locate them on the county url for records that was supposed to have everything.

It has been very difficult with the grading. Too much noise and dust. Is there anything we can do ??? All of the neighbors have had ENOUGH !

With working from home – we can't hear on the telephone. The dust is covering everything and causing us all to cough ! Is it COVID-19 or just dust ?

Who do we contact to take a break from the noise and maybe water down the dust ???
