---

Hi Camille,

I conducted the weekly site inspection at Highland Estates on Tuesday this week. The silt fence onsite is still in need of repair, but overall the site looks pretty good. I know we are close to completion, so I will be interested to see how the site looks next week following the rain. Neil was onsite on Wednesday and said that the silt fence still needs to be repaired, but that the rest of the site looks pretty good.

Thanks!

Hi Bob,

I'm sorry I missed your onsite earlier this week. There are still a couple of outstanding issues onsite from last week, and I am interested to see how the site looks after a week of rain.

Please address the following:

**Lots 9/10**

- The silt fence along the southern boundary of the site is still in need of repair. Please replace the deteriorated fence and key in the new fencing that was added.

**Lot 11**

- The windbreak fence was laying on the ground. It has been very windy the past week. Please ensure that the windbreak is repaired.
- The silt fence along the southern side of Lot 11 is still in need of repair. Please move the straw wattles and ensure that the fence is keyed in along the south side of the site.

Please let me know if you have any questions!
